WORK EXPERIENCE

Onstro (formerly Teknorix)

Aug. 2021 – Present

Software Engineer

Verna, GA

- As a **Frontend Software Engineer**, I lead the development of **user-facing products and frontend architecture**, shaping our design system, roadmap, and user growth initiatives.
 - Built and maintained multiple production-scale applications for the client's VIB ecosystem, including:
 - [connect.vib.be](#) – Collaboration and event platform.
 - [grants.vib.be](#) – Research and grant management.
 - [forms.vib.be](#) – Form automation and workflows.
 - [home.vib.be](#) – Internal hub for communication and updates.
 - [kb.vib.be](#) – Knowledge base system.
 - [catalog.vib.be](#) – Cataloging and asset management.
 - Designed and implemented a **modular, maintainable frontend architecture** using ReactJS/NextJS alongside Typescript powering multiple VIB products, enabling faster feature delivery and long-term scalability.
 - Translated designs into **pixel-perfect, responsive interfaces** with consistent performance and UX standards.
 - Enhanced development speed by 80%**: Experimented and implemented new technologies like PNPM and ESBuild leading to improved web development speed.
 - Improved build performance by 50%**: Identified and implemented code improvements for Webpack, optimizing build performance and reducing bundle sizes.
 - Designed micro-front-end architectures**: Facilitated code sharing with npm packages, module federation, and git-submodules, enhancing developer experience and code reusability.
 - Developed coding standards: Enforced common coding standards, contributing to ISO certification efforts.
 - Integrated APIs and optimized data management: Implemented caching, debouncing, and pagination techniques, significantly reducing unnecessary API calls and enhancing overall efficiency.
 - Assessed project requirements, helped to prioritize development activities and reduced ad hoc work requests by 30%.
- Mentored and trained interns and junior developers through pair coding and code reviews, improving onboarding speed and code quality across the team.
- Supported recruitment efforts by assisting in candidate evaluation and interviews, helping the company attract and retain skilled professionals.
- Recognized as “*Talent of the Year*” and “*Upcoming Leader of the Year*” for demonstrating technical excellence and leadership impact.

PROJECTS

- [Booko-DAV](#) - Self-Deployable WebDAV for eBook Management on modded Kindles using Cloudflare R2 and workers,
- [Glaucoma detector](#) – A straightforward user interface for quickly calculating the cup and disk using the Canvas API.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, ReactJS, NextJS, Redux, Node.js, Express.

Build & Styling: Vite, Webpack, ESBuild, SCSS/LESS, Ant Design, ShadCN.

Testing & Deployment: Jest, React Testing Library, GitHub Actions, Vercel.

Version Control: Git, Bitbucket, SourceTree.

EDUCATION

Padre Conceicao College of Engineering
Bachelor of Engineering in Computers

July 2021
Verna, GA
